Education

York University

Expected May 2027

Bachelor of Science in Computer Science - GPA: 3.5/4.0

Toronto, Canada

Technical Skills

Languages: Python, Java, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Eclipse, Pycharm, Postman, Dbeaver, Git/Github

Certificates: Python Certificate (Code Academy) , Django Python Framework (Udemy)

Other Activities: General Secretary Computer Club, Director IT Science Society - (High-School) 2020-2023

Experience

Software Engineer Intern - Backend Team

May 2024 - August 2024

AletheaAI

Singapore

- Gained practical experience with **Django** and **FastAPI**, working on CRUD operations, rendering templates, writing views, querying databases, and using tools like **Postman** and **DBeaver** for API testing and database management
- Optimized codebase by auditing and removing obsolete environment variables and APIs
- Performed **blackbox testing** on the company's dApp, identifying and fixing critical bugs to improve overall reliability

Developer Intern

June 2022 - July 2022

Arbisoft

Lahore, Pakistan

- Collaborated with a team of 20+ developers to design and implement website features for an international fashion brand
- Enhanced user experience by analysing website traffic and activity using AI to determine user preferences; launched pop-up feature ability that showed users current trending products
- Fixed existing bugs related to product zoom and other features that improved the overall website productivity

Co-Founder, CEO

May 2020 - Feb 2023

Rozgari

Lahore, Pakistan

- Co-founded a not-for-profit to address unemployment among daily-wage workers amidst rising inflation during the Covid-19 pandemic; raised **1,000,000 PKR** through fundraising efforts to successfully launch website platform
- Developed an online and SMS booking platform with **HTML/CSS/JS** for users to efficiently secure home services (gardening, handyman etc) from vetted service providers; achieved **5** bookings per day within 12 months since launch
- Led partnerships and marketing campaigns that onboarded over **25** service providers over a span of 18 months

Projects

Library Management System | *Python, PostgreSQL, FastAPI*

2024

- Designed and implemented a Library Management System using **FastAPI** and **PostgreSQL**, enabling efficient CRUD operations for book records with secure database connections and error handling
- Developed and deployed **RESTful API** endpoints for book management, incorporating Pydantic models for data validation and RealDictCursor for optimized SQL query performance
- Enhanced data retrieval capabilities with specific endpoints for searching books by ID and title, ensuring efficient and user-friendly access to book information

Gaming Project - GuessTheNum00 | *JS, HTML, CSS*

2023

- Led a team of three to develop an interactive game (website) that included random number generation, three difficulty levels and three different gameplay themes
- Developed a responsive design for an interactive game-play with **JavaScript**; Utilized **DOM manipulation** and event handling to trigger functions and update the game state based on user actions
- Incorporated aesthetic themes into the application using **CSS** that allowed dynamically altering visual experience

Tic-Tac-Toe Game | *Python*

2022

- Developed a version of Tic-Tac-Toe game using python
- Utilized object-oriented principles with classes to organize and structure the code.
- Created **Modular Code Structure**; Separated functionalities into different files, promoting code maintainability and readability
